

Aspiration Project Case Study Profile Submission Form

Your Name:

Your Email Address:

Profile Contact:	<input type="text"/>
Profile Title:	<input type="text"/>
Company:	<input type="text"/>

1. What is the location (city, state, country) of your FAAST project?

2. What is the completion date of the project?

3. What is the name of the Company purchasing FAAST?

4. What is the facility and application where FAAST is installed?

5. What type of space(s) are the aspirating smoke detectors protecting?

6. How many FAAST devices were used in the project?

7. Is the FAAST system integrated with the fire system or building management system? If yes, which system?

8. How was the system designed (by you or by System Sensor)?

9. Is the design incorporating very early warning, early warning or standard fire protection?

(continued on page 2)

10. Why did this project require aspirating smoke detection?

11. Is FFAST replacing an existing smoke detection system in this project? If yes, what were the issues with the existing system and how does FFAST solve these issues?

12. Was FFAST chosen for this project for any of the following reasons: superior false alarm immunity, remote monitoring, differentiated technology?

13. Please tell us more about why FFAST was chosen and what problem it helped the end user/installer to solve.

14. How would you describe your experience using the FFAST system in the following areas:

System Design

System Installation

System Commissioning

Please attach any additional information / files (draft copy, images, specs etc.) to the email when submitting the Aspiration Project Case Study Profile Submission Form.
